

## Solaplex™ Pigments

### Artist Colour Application

Rockwood Pigments has a worldwide reputation for the manufacture and marketing of a unique palette of high quality inorganic Artist Colour pigments. This complete palette is based on cadmium, cobalt and iron compounds, the traditional colouring materials used by fine artists for hundreds of years.

Cadmium Yellows : PY 35  
Cadmium Oranges : PO 20  
Cadmium Reds : PR 108  
Aureolin Yellows : PY 40  
Nickel Titanate Yellow : PY 53  
Cobalt Aluminate Blues : PB 28, PB 72  
Cobalt Chromite Blue : PB 36  
Cerulean Blues : PB 35  
Cobalt Violets : PV 14  
Manganese Violet : PV 16  
Transparent Iron Oxide Yellow : PY 42  
Transparent Iron Oxide Red : PR 101

The Solaplex™ Range enhances the traditional colour palette, bringing innovation and creativity back into fine and graphic art.

Solaplex™ Pigments have a new chemistry (CI Pigment Yellow 216) and are Cadmium and Lead free. This new addition to the range offers unique, bright yellow and orange shades, with a quality finish and colour permanence for artists' oil and water-based paints.

Solaplex™ Pigments can be supplied as powder, colour-matched powder blend or liquid dispersion.
